SUMMARY

I'm a Frontend Developer deeply rooted in the React ecosystem and the usage of modern web technologies. Passionate about creating responsive, user-centric applications with clean, maintainable code while bringing product concepts into reality.

EXPERIENCE

❖ **Frontend Developer, CompasAI** Aug 2025 ..... Mar 2026

Remote

I was responsible for building and maintaining scalable, high-performance user interfaces across AI-driven products. Collaborate closely with design, backend, and product teams to translate complex requirements into intuitive, responsive experiences. Focused on clean architecture, reusable components, performance optimisation, and delivering seamless user interactions across several CompasAI products.

❖ **Frontend Developer, Sequential Jobs** Nov 2024 ..... Oct 2025

Remote

- Led the development of a comprehensive recruitment management platform designed to streamline and digitise end-to-end hiring workflows for recruiters, job seekers, panellists, and medical personnel.
- Architected and implemented structured hiring pipelines including CV-based screening tests (application and job tests), in-platform interview scheduling and evaluation, multi-panel grading systems, and automated candidate progression tracking.
- Built a collaborative evaluation system where recruiters could invite panellists, conduct interviews directly on the platform, and aggregate structured scoring across multiple candidates to support objective decision-making.
- Developed post-selection workflows covering documentation management and medical screening processes. Enabled secure document uploads, medical test scheduling across designated locations, and direct result submission by authorised medical personnel to ensure compliance and transparency.

❖ **Backend Developer Intern, Hngx** Aug 2022 ..... Sep 2022

Remote

Participated in an intensive backend engineering program focused on building scalable server-side applications and collaborating within cross-functional teams. Developed and maintained RESTful APIs, implemented authentication and authorization systems, and worked with databases to design efficient data models. Gained hands-on experience with version control, code reviews, agile workflows, and shipping production-ready features under tight deadlines.

EDUCATION

❖ **Obafemi Awolowo University** 2020 2025

Osun State, Ile Ife

B.ED, Social Studies Education

Leveraging interdisciplinary perspective to develop user-centered applications. Applying social research methodologies to improve user experience design.

❖ **Harvard University - CS50X** 2023 2023

Introduction to Computer Science, Remote

Completed intensive 11-week program covering fundamental computer science concepts. Technologies learned: C, Python, SQL, HTML, CSS, SQLite. Developed multiple projects demonstrating practical application of learned concepts.

SKILLS

React Node.js

Express.js	Tailwind CSS
Responsive Layouts	JavaScript ES6+
Version Control	API Integration
UI Component Design
